

Mia Radevski

she/her

Volunteer

Mia is a fourth-year doctoral student in the Cognitive Neuroscience Experimental Psychology program at the University of Kentucky. She graduated from Slippery Rock University in 2019 with a B.S. in Psychology. Mia's research interests broadly include sex differences in cognitive, behavioral, and social effects of alcohol use in large samples. She is interested in understanding how cognitive and behavioral effects such as attentional bias and behavioral control contribute to the progression and maintenance of problematic alcohol use. Additionally, she is interested in understanding the relationship between these cognitive and behavioral effects may contribute to the victimization of intimate partner violence in women. Mia is currently the chair of the American Psychological Association Science Student Council and the behavioral neuroscience representative, and she is a member of the Kentucky Psychological Association. Aside from research and academic work, Mia enjoys spending time outdoors with her three dogs, traveling, or baking bread or desserts.
